00:00:00 Speaker 1

We are now ready to answer your questions.

00:00:02 Speaker 2

I'm ready to answer. Good afternoon again. Let us proceed with the question and answer and recommendation of the panel. So, let's start with Dr. Romel.

00:00:19 Speaker 3

This is the connector.

00:00:29 Speaker 3

.....

00:00:55 Speaker 3

memo process naman na derecho mugendima.....

00:01:24 Speaker 1

So, in the password, I'm using the SHA256 encryption. And I'm using email confirmation to create an account to the student to know that the email is correct and valid.

00:01:47 Speaker 3

I'll start the test case.

00:01:54 Speaker 3

considering sensitive information.... algorithm.....

00:02:23 Speaker 1

Yung pagdetect po nang duplicate ng records across the Mogratos, mgawang kungamin ng weighted record linkage. And for the recommended scholarship ng po is decision trick.

00:02:34 Speaker 3

Hmm, okay. Sige break time ng sa sensitive information.

00:02:39 Speaker 1

Ah, I, ah, one of our anapo sensitive information po, ah, one of our sensitive data in the system is the password and the user ID.

00:02:53 Speaker 3

how about the the document itself the insensitive scholarship documents okay right to your confirmation document and scholarship the student application profile and

00:03:29 Speaker 1

Say student application profile ko nasa system na po namin siya so...

00:03:34 Speaker 3

Oh yeah, pana nipo na protectan yang password lang? I mean password lang pweding na no? Magin protection ya? Downloadable, downloadable by mga... files. Easy. Yes, of course. PDF file, password.

00:04:15 Speaker 3

layered security.....

00:04:33 Speaker 3

Hello. Hello. Documents. CSB protect CSB exports.

00:05:04 Speaker 3

Formatted PDF file, CSB, November 3 to CSB.

00:05:11 Speaker 4

Yung poster yung sa, yung pag-export po nang sa Excel file po, yung po yung...

00:05:20 Speaker 3

Internetas na po na po na po na...

00:05:32 Speaker 3

During your testimony, major vulnerable.

00:05:36 Speaker 1

One of them is. It says.

00:05:42 Speaker 3

Cyber attack.

00:05:43 Speaker 1

Grantor account, Sir.

00:05:57 Speaker 1

I cannot say brute force po kasi merupo kaming 3 attempts po. 3 attempts. I think sir sa... the... request... request injection.

00:06:13 Speaker 2

SQL.

00:06:14 Speaker 1

No, no. Request from... from server because my server po was in me. So my katong po na request, then telephone don't let up yung coming system.

00:06:26 Speaker 3

Mmm, middle man... Middle man..... Thank you.

00:06:47 Speaker 2

I know without killing everyone.

00:06:54 Speaker 5

Okay, again, congratulations for your presentation. Ian, I would like to commend also the name tags na tilagabalahan.

00:07:05 Speaker 3

Yes.

00:07:07 Speaker 5

Ian naka team with your presentation. I mentioned kasi naga abala diba. Very good important nayin kasi naga abala taye. Despite ng ating mga heavy schedule na easy ni kasi.

00:07:23 Speaker 5

Okay, so I would like to start with the Number 2 for specific objectives. I would like to see in the system how do we validate the student record, as well as how do we prevent multiple active scholarships and also the duplication. So provide a test case or if you have a scenario.

00:07:54 Speaker 1

Yung objectives. So objectives. Validate student records. So first is to validate the student record. Admin po. Peduna po makita ni admin. Yung mis document na upload the student. Dun parang po sa creation.

00:08:28 Speaker 1

So fedina ko dito marita ni admin if anapoli validate if anapo if valid namat po yung. Oh, yes ma'am.

00:08:39 Speaker 5

Manual validation.

00:08:41 Speaker 1

Meron po ka main automatic validation dito po sa creation ng account.

00:08:52 Speaker 1

So if you upload the student COR, or in this case, the COR, then upload the ROG. So dito na para validation ko namin si COR, it took maa push ya student number and student number, it took maa push na ROG nam penasa.

00:09:17 Speaker 5

No, how can you prove them 100%?

00:09:22 Speaker 5

comparison ya, accuracy of getting the student number from the COCOR, COR, those records from the database. I will accurate. Kasi image chantam. Kasi you uploaded an email. PDF. PDF. So, the ano ka ano, the ano ka accurate. Kasi makaya 7 magin one.

00:09:48 Speaker 5

Seven, the number. Yes, PDF.

00:09:54 Speaker 1

Do we use an algorithm for this? The algorithm will check for the data, not the image itself. So the text data. So when the algorithm checks for the text data, it converts into a string. Then this.

00:10:14 Speaker 1

Into a string, then it will check into the system if those to that number if though if that's to that number.

00:10:23 Speaker 5

Exactly. And question is accurate. Not all the time. Clear PDF. How can you prove that accuracy is very good when it comes to

00:10:43 Speaker 5

capturing your text from the PDF file

00:10:48 Speaker 1

to be honest ma'am I can say that one out of 10 hours the accuracy of the system is 8

00:10:58 Speaker 5

how many how many times kayo na done and a test

00:11:03 Speaker 1

like this we test multiple times though I can say ma'am na about that's it

00:11:22 Speaker 5

Like going back.

00:11:27 Speaker 1

We test multiple times. We have a test master.

00:11:31 Speaker 5

Wow, test master. The admin test master, documentation. Master tester.

00:11:46 Speaker 1

I can say ma'am confidently 30 plus.

00:11:50 Speaker 5

Okay, these are all...

00:11:53 Speaker 2

I do believe...

00:11:55 Speaker 5

I do believe that we are forming lahat. But where's the documentation? Do we record all of these?

00:12:03 Speaker 4

Yes.

00:12:06 Speaker 5

Those were discussed because of the document.

00:12:13 Speaker 5

Test case test case is a table table. Were you able to discuss? Yes or no? Yes, yes.

00:12:27 Speaker 4

Yes.

00:12:39 Speaker 3

...

00:12:43 Speaker 4

Like about four times per circle.

00:13:03 Speaker 5

Four times...

00:13:08 Speaker 4

Page 44, 41 pomo.

00:13:10 Speaker 5

41.

00:13:15 Speaker 4

Not the whole documentation po na.

00:13:18 Speaker 5

Very good.

00:13:21 Speaker 4

Like a short summary lang po bin rift ka na po se sa test kit po pinad.

00:13:25 Speaker 5

41.

00:13:26 Speaker 4

41 yun table one po. Yun po.

00:13:30 Speaker 5

Asana, who's going to conduct and develop centralized ownership from the test case, cover major

00:13:36 Speaker 5

Validation. Mason the results indicates of the test important unknown it retrieve nothing from the PDF. I

00:13:50 Speaker 4

deep deeper si na model por sobrandami ko na test cases for na.

00:13:57 Speaker 5

Yeah, no. Yes, that is very important. So much.

00:14:03 Speaker 5

start with the algorithm and inclusion. Very good that we have three. Okay. But then the implementation is not recorded. But the implementation is not recorded. Now, if you can see Tristan, the panel ginawa, pero, you were able to use it on the part of uploading, you know, create account.

00:14:32 Speaker 5

Pero para magic siyang cha na na na na siya. Na na mag na siya, na cha check na siya. Pero wala tala no discussion about this. You know that is very important. Mm-hmm. Kasi dinamik nisiya implementation hindi na sabi. And at the same time, kung you were able to test no? Kun talagang accurate kasi na draming algorithm, but you chose.

00:14:56 Speaker 5

Liz Levenstein tamabako. What made you choose? That he lamb nakita ni sha na search na sambesas yun na? Ola na ho no basis na baka ki na pi na

00:15:07 Speaker 3

pi na pi na pi na metrics para masangi ni accuracy. Correct. Oh, okay, sir.

00:15:17 Speaker 4

Thank you for...

00:15:20 Speaker 5

Mentioned about centralized, centralized in one. What I know what aspect I'm scoping that is the centralization of this document. What covers the centralization? You have no question. Okay, how?

00:15:36 Speaker 1

So I can say centralized.

00:15:46 Speaker 1

Center piece ng system.

00:15:50 Speaker 5

Student and granters transaction. Centralized. That's the reason kaya centralized. Actually identify centralized. No, ano ano kino covers a scope. No centralization. No, that's one next.

00:16:16 Speaker 5

You know, accurate. Algo test case for preventing ayun. Na prevent, how do we prevent? Nandung pa lang tayo sa validation. After validating ay. Multiple active scholarship. How do we prevent this?

00:16:35 Speaker 1

Ito po ped pa either so granter side po pede na po mag upload si granter na scholarship

00:16:45 Speaker 1

An example scholarship is at least then. If this this students book is not a record nanya or not a record napuna ibang practice.

00:17:03 Speaker 5

Yes, please. Marian student.

00:17:12 Speaker 2

Currently.

00:17:15 Speaker 1

So, be prevented. So...

00:17:42 Speaker 2

...

00:17:44 Speaker 5

scholar na.....

00:18:11 Speaker 1

So other scholarship for like this one... Yeah, so... For this semester, I for this scholarship... So... Once po na na complete nami students, na pagrequest na pusa ng rec materials, then tul po kami naga na gaga na gaga naga na gaga se paga nagrequest na pusa na materials, then

00:18:41 Speaker 1

Malalak na po yung parang malalak na po yung scholarship ni ni students sa kanya po.

00:18:48 Speaker 5

Pera ano pana pana pana pana pana pana pana pana pana gagawi na po nimao hindi na clear no student na sha ay scholar naman sa iba nawala jet. Okay hindi yung hindi ni dun ki na woi scholarship eh sa iba. Nyare ano sha nam ni mayor pajeon.

00:19:09 Speaker 4

Yes.

00:19:10 Speaker 4

Diponami maa control po yo po student po is muga a play po sa parang makita ramposa para say bong baranga did maga. I say bongo got the maga play put on a second scholar. Puna lau. He's a posa limitation for namin yuna paya po yung call nam po kipnang bolsuna grant mas granters po yuna po yuna po yuna po yuna po yuna po yuna pa.

00:19:39 Speaker 5

Halimbawa sa... I know... K... K... K... K... K... K... K... K...

00:19:56 Speaker 3

K....

00:19:57 Speaker 5

K...

00:20:04 Speaker 3

K.... K....

00:20:07 Speaker 2

Anybody want to actually get in.

00:20:25 Speaker 5

Yeah. Identify.

00:20:37 Speaker 5

So that would be the time to upload. Can we add? I'll upload the list coming from outside. And that will be also part of the threshold. I know the duplication.

00:21:09 Speaker 1

Client records.

00:21:16 Speaker 5

That's one of our recommendations.

00:21:29 Speaker 5

Nakuoni natin lahat na mga possible na bidigay nang scholarship at the online kohina natin ng database among students nambulsu tapos ya upload natin yan para madin point of comparison ko meron nasilang scholarship se labas ko meron na hindi silang priority para sa scholarship se lo nako miya.

00:22:00 Speaker 3

One-stop shop.

00:22:12 Speaker 2

Upon uploading.

00:22:23 Speaker 2

.

00:22:52 Speaker 2

even your administration at it's a main. Namo monitor the laya. Namo lang. Telangana be preventing duplication.

00:23:01 Speaker 5

As in the data.

00:23:03 Speaker 2

As in the data. Na kita. DK maa kita na bin na bawa shi niga partner na ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba ba duplicate.

00:23:20 Speaker 2

Data leads a local university.

00:23:30 Speaker 5

And then explain the process of pre-approved validation in Bayon. Pre-approved validation. Manwalta. Simple na ewako sayo sin sabin pasi na kam pre-approved validation.

00:23:43 Speaker 2

So documents.

00:23:50 Speaker 4

Pre-appo validations.

00:23:51 Speaker 1

I just hope. Pre-approval. Sorry about. Dito na pushes a system. So pre-approval, baku papu, example.

00:24:15 Speaker 1

Si student mo kapag tulo sa process niya, pedina kung check tito ni admin yung mga documents si student.

00:24:26 Speaker 5

Naga apply ba saan. Naga apply yang kaya.

00:24:29 Speaker 1

Apply application table. Pedina naman ko dito sa grantor, which is, dito pa sa application section naman ko. Pedina ko dito ni check if

00:24:42 Speaker 5

papano sige halim bawa, home kama naman meron ka

00:24:45 Speaker 5

Check, check.

00:24:46 Speaker 1

I'll do the post. Sorry. Then. Then. Then the book. Mangita na poni graduate student details ni student. Then Mangita na pomong sa nasiyan step. Then this na na pomakita na documents na epinasa ni student assistant.

00:25:08 Speaker 5

Mm-hmm.

00:25:10 Speaker 4

What specifically do you needing then?

00:25:13 Speaker 1

Requirements ko.

00:25:15 Speaker 4

In Nangalawa indigency indigency for valid ID modeling application.

00:25:23 Speaker 1

Short essay.

00:25:26 Speaker 5

Handwritten short essay.

00:25:31 Speaker 1

JPEG file or PNG.

00:25:34 Speaker 5

Sigin. Sigin. Last for formal last. Yung recommendation, but check yung sa slides. Slides disagree.

00:25:44 Speaker 5

I'm sorry. The recommendation. Yeah. Number one.

00:25:49 Speaker 1

Improve validation, verification, and detection. Strengthening the validation using additional verification fields, improved record matching methods, and stricter checking for incomplete, inconsistent, outdated, or incorrectly encoded data.

00:26:02 Speaker 5

It should not be there. It should be part of your system because that's your system and part of your objective number two.

00:26:14 Speaker 5

OK, so that will be all for me. Thank you.

00:26:17 Speaker 1

Thank you. Thank you.

00:26:20 Speaker 5

Thank you.

00:26:24 Speaker 2

OK, so first of all, congratulations on your. Thank you. Chapter 4 chapter 4 based on your objectives and answer those objectives.

00:26:43 Speaker 2

Okay, and about objective number one objective number one and is which objective number one. Okay, then another question is the system can be expanded in the future and how?

00:27:06 Speaker 1

Yes, for future researchers.

00:27:11 Speaker 2

For example, for example, features or process.

00:27:35 Speaker 2

Like grantor and so on.

00:27:36 Speaker 1

Yes, pagdagdagdagpo ng grantor si admin po si client. Kadina pusyan wo create ng account ni grantors. So, um, it was a grantor management. And pepinung na poito ko sa ralipo sa grantors. May magdagpo na partnership na grantors si postas campus.

00:27:56 Speaker 2

Okay.

00:28:03 Speaker 2

So one of our sensitive data, sir, is the student ID.

00:28:16 Speaker 1

Because student ID is a unique ID.

00:28:26 Speaker 1

the student, all the documents for the student. Other students, documents for only admin and...
