BulsuScholar Test Case Summary

Test run: October 20, 2026 | 284 automated backend tests passed

The TC numbers are summary IDs assigned to grouped core functions. Pass refers to automated backend testing, including mocked services and migration contract checks; it does not claim that every workflow was tested in the live browser.

Test Case ID	Core Function	Expected Result	Actual Result	Status
TC-01	User Login	Valid credentials return the correct account identity and reset failed login attempts.	As expected	Pass
TC-02	Failed Login and Account Lockout	Invalid credentials record failed attempts; reaching the configured limit locks the account.	As expected	Pass
TC-03	Pending Account Login Restriction	Students awaiting account approval cannot access student workflows.	As expected	Pass
TC-04	Email MFA	Inactive students and grantors receive an email challenge without receiving login tokens before verification.	As expected	Pass
TC-05	Account Recovery	Recovery creates a challenge, and completion requires that challenge.	As expected	Pass
TC-06	Role-Based Access	Unauthorized roles and users accessing another account's records are rejected.	As expected	Pass
TC-07	Student Registration	Newly registered students remain pending until email confirmation; the client cannot automatically confirm an email.	As expected	Pass
TC-08	Duplicate Account Detection	Student number, email, and normalized mobile number are checked against existing account records.	As expected	Pass
TC-09	COR Information Extraction	Year level is extracted from supported document layouts without confusing academic year with year level.	As expected	Pass
TC-10	Signup Document Requirements	Required COR, ROG, and identity documents follow the student's year and semester rules.	As expected	Pass
TC-11	Year-Level Discrepancy	A declared year mismatch is recorded for administrator review instead of automatically preventing signup.	As expected	Pass

Test Case ID	Core Function	Expected Result	Actual Result	Status
TC-12	Email Confirmation	Confirmed Auth identity is used to process the student; unconfirmed or spoofed identity is rejected.	As expected	Pass
TC-13	Resend Confirmation Email	Authorized administrators can resend confirmation; cooldowns are enforced and failed delivery releases the sending claim.	As expected	Pass
TC-14	Pending Account Document Display	Only the latest signup submission for each document type is returned.	As expected	Pass
TC-15	Document Preview Recording	Administrator preview is recorded; preview processing fails when its audit record cannot be saved.	As expected	Pass
TC-16	Manual Account Approval	Unauthorized reviewers, unconfirmed students, and missing signup requirements prevent account approval.	As expected	Pass
TC-17	Automatic Account Activation	Email confirmation activates the student only when automatic review is enabled and required documents are approved.	As expected	Pass
TC-18	Welcome Email	Newly activated students trigger a welcome email; existing active students do not receive another one. Delivery failure does not undo activation.	As expected	Pass
TC-19	Student Application Profile Validation	Required profile information is validated, and locked fields are taken from the stored student record.	As expected	Pass
TC-20	Profile PDF Generation	The generated PDF uses the official A4 template; preview copies include a draft watermark.	As expected	Pass
TC-21	Profile Resubmission	Older pending profile requests are superseded, and the review queue returns the latest profile per student.	As expected	Pass
TC-22	Profile Review	Stale submissions are rejected, rejection requires a reason, and reviewed submissions remain immutable.	As expected	Pass
TC-23	Automatic COR Approval	A valid COR receives system approval even when manual account review is enabled.	As expected	Pass
TC-24	Scholarship Application	Application identifiers are generated by the server, and unauthorized identities or document paths are rejected.	As expected	Pass

Test Case ID	Core Function	Expected Result	Actual Result	Status
TC-25	Request Materials	Preflight uses the authenticated student; business failures return structured conflicts, and successful selection returns the stored materials request.	As expected	Pass
TC-26	Scholarship Withdrawal	Withdrawal uses the authorized transaction, and official roster assignments cannot be withdrawn.	As expected	Pass
TC-27	Official Roster Processing	Matching applications are identified for conversion; identity conflicts and unknown scholarships are flagged.	As expected	Pass
TC-28	Grantor Location Selection	Province-municipality pairs are validated, including other regions; mismatched pairs, unknown provinces, and duplicate aliases are rejected.	As expected	Pass
TC-29	Applicant Filtering	Filters are applied before pagination, and reports follow the selected grouping and date order.	As expected	Pass
TC-30	Waitlist Visibility	Students receive their queue position without other students' information; grantors access only their own announcement queues.	As expected	Pass
TC-31	Waitlist Offer Processing	Ineligible acceptance is reported after slot release; the expiry endpoint requires the correct secret.	As expected	Pass
TC-32	Announcement Publishing	Creation requires an image, retries avoid duplicate announcements, and publishing uses the database workflow.	As expected	Pass
TC-33	Targeted Announcements	Specific recipients are restricted to students owned by the grantor's workflow.	As expected	Pass
TC-34	Inbox Required Action	A rejected document produces one required action, while an active waitlist offer takes priority.	As expected	Pass
TC-35	Academic Cycle Management	Full administrators can access cycle controls; invalid cycles and stale concurrent updates are rejected.	As expected	Pass
TC-36	Document Renewal Status	A cycle change identifies missing current-cycle documents, and the renewal banner clears when applicable requirements are approved.	As expected	Pass
TC-37	Report Generation	Reports respect filters, validate inputs, generate formatted PDFs, and protect CSV exports against spreadsheet formulas.	As expected	Pass

Test Case ID	Core Function	Expected Result	Actual Result	Status
TC-38	Support Tickets	Users access only their own tickets; administrator replies are stored in the conversation.	As expected	Pass

Coverage gap: Recommended scholarship ranking is not marked Pass here. The current suite does not contain a dedicated test covering its complete scoring formula and ranking order.
